

BIG BEN BEY

In 1795 Big Ben Bey laid the foundation of our federal government in New York City. He was a Moorish master astrologer, metaphysician and a 360 degree master mason plus a time clock inventor. He invented the Big Ben clock. Ben Bey was born on March 6, 1732 in Philadelphia, Pa., which is the original ancient Alhambra of North Africa.

It was Big Ben Bey who phrased the word God from the three departments of our federal government, namely, Gov't, Ordinance, Department of Justice. Annuity Coeptis. Big Ben Bey employed the first capital letter from each of the three departments which spelled God. In God We Trust, meaning good government for the people, and by the people in unity in the name of law, truth, freedom, justice, equality, peace, progress, and the pursuit of happiness, the kingdom of God on earth. Al-ham-dul-il-ah. All praises due to Allah (God of the Universe) Bear in mind that this word God definitely does not imply the creator of the universe for it has proved itself as to what it implies. It is the basic reason as to why our federal government cannot have anything to do with religion.

Big Ben Bey was an astrologer, metaphysician, and a humanitarian. The people had declined to an all time low morally; as a result of ignorance, war and bloodshed, and destruction while under the old Muhammed priesthood of dictatorship. So Big Ben Bey had no alternative than to release his phrase God as a symbol of spirituality in order to solve that crucial problem of crime among the people by way of instilled fear of mystery doctrine in order for the people to discipline themselves for a moral intelligent society. The people were too ignorant to understand Big Ben Bey's science of metaphysics and astrology therefore, Big Ben Bey had to make his supreme sacrifice in the name of humanity by giving the priesthood the phrase God. So this is the basic reason as why our federal government made education compulsory in order for the people to understand by reasoning the difference between mythology and truth. The word God was used for the first time in 1795.

In the year 1215 Moorish calendar year, which is equivalent to 1795 (Crusade-Oroix) or Christian calendar year, in the region of (Anglia-Belgium-Armsterdam) known today as New York City, the Empire State. A fearless Free Moorish astrologer and mathematician by the name of (Ben Bey) laid the foundation of the universal Apprentice Hall of the science of government, human character, unity, human equality, justice and peace (Salaam) upon the 12 signs of the Zodiac and the 4 squares of 90 degrees. And termed it the (Hub) of the universe for perpetual universal freedom. This foundation is referred to as the (White House) D.C.. And Ben Bey is referred to in Crusade U.S.A. history books as "Benjamin Bannicar".
